3

Innovation, durability and unequalled performance are just a few words our customers use to describe Cargo Express. Our philosophy is simple. Start with high-grade materials applied to a well-engineered design, add good people who pride themselves in their work, and you end up with a superior product.

INTRODUCING THE CARGO EXPRESS BUILD TO SUIT SYSTEM

Cargo Express is the premier manufacturer of durable trailers, but we don't stop there. We believe in what we call "modifiable." We believe that the customer should be able to order a trailer EXACTLY how he wants that trailer, choosing from among hundreds of options and packages. We don't believe the manufacturer should define fixed models and inflexible designs.

Truly the combinations we make available are nearly infinite. What's more, we also believe it should be as easy as possible to ORDER that unique trailer. That's why we are proud to introduce the Build to Suit system.
